Set up your subscription

Before you can use the TrinityP3 Agency Search, you will need to select a subscription plan: monthly or annual. Once the subscription is set up, you will have access to the Agency Search AI function.

Start your search

The AI uses natural language to define and search for the agencies that best fit your needs. Prompt the AI with the type of agency, its size, location, and any specialty expertise or experience you think is essential. E.g. “A boutique creative agency in Melbourne, Victoria with beverage marketing experience”. When you click “Search Agencies” the AI will go to work. This may take time, so be patient.

Interpreting the results

The TrinityP3 AI Agency Search will give you up to eight potential agencies, including their new business contact details, capabilities, and the reasons for their recommendations. There is also an option to view a summary of the agency information stored in the Agency Register.

After each search, you can give feedback to the AI to help improve the search results. This includes using the thumb-up/down icon for each agency recommendation and providing an overall ranking of the results, along with feedback. Taking the time to give this feedback helps the AI Search better deliver the results you need.
